

# COLLEGE ADMISSION SYSTEM

# ABSTRACT

Today all the work at the time of admission of the students is done manually by ink and paper, which is very slow and consuming much efforts and time. It is required to Design of a Computerized Automated Student Admission System, to speed up and make it easy to use system. The system will provides a user-friendly interface for students to book their admission. The system incorporates various features and functionalities to achieve this goal. This paper-pen process is not only time consuming but also inefficient and it's difficult to maintain the paperwork and the records. Through this software we are trying to overcome the problem of maintaining paper based records and focussing on the digital library.

FINAL APPLIED

## FEATURES AND HIGHLIGHTS

**Register:** User want to register before entering to the website

**Add Course:** Admin can add new courses to the website

**View course:** User can view each courses that they can apply

**View Student:** Admin can view all the students who applied for various courses in the college

**View Course details:** User can view course cutoff mark and outcome of the course in the time of applying the course

**Final Applied:** Admin can view final applied students list and mark that student is eligible or not

# THIRD-PARTY LIBRARIES

Third-party application and libraries in Django are pre-built components or packages developed by the community or other companies that you can use to extend the functionality of Your Django projects.

The third party libraries used in my project is:

**.Django Jazzmin:**A drop-in app to jazz up your Django admin site, with plenty of things you can easily customize, including a built-in UI customizer.

## CHALLENGES FACED

The major challenge faced by me was to plan the process flow of the project. While coming to the coding part I had difficulties in using the Django user for registering students as it was new to me

## CONCLUSION

Online admission process is the best suitable process for the present generation. Now a day's people who use mobile and internet is high. So the students feel that online application process is convenient for them to apply. Through the college website the students can find all the information regarding the college. They can find each and every process of the online admission clearly. In case if they are not able to proceed with the application process the administration contact details are provided in the website through which the student can contact the college and get it clarified. It is also easy for the college to store the records of the students. They need not carry their documents each and every time instead they can submit it at the time of online application process time
